

Deniz Çetin

Praha, Czech Republic • deniz.sayin.cetin@outlook.com • +420 608 275 726 • github.com/CinnamonPerfume

Summary

Software Engineering student at ČVUT FEL with experience in C and full-stack development. Flexible and ready to contribute where I'm needed most.

Education

Czech Technical University in Prague (ČVUT FEL)

Prague, Czech Republic

Bachelor's in Computer Science • Expected Graduation 2028

Relevant Coursework: Programming in C, Database Systems, Networking Fundamentals, Project Management, Discrete Mathematics

Doğa Koleji Highschool

İstanbul, Turkey

Graduated with *Üstün Başarı Belgesi* (Certificate of High Achievement) • 87% GPA (approx. 3.5/4.0)

Experience

University Ambassador

2020 – 2024

Czech Technical University in Prague (ČVUT)

- Staffed information stalls at open days, assisting prospective students and families with questions about university life and admissions
- Supported incoming international and Erasmus students with settling into Czech Republic life and university orientation
- Photographed and filmed Erasmus orientation week events for official university use
- Researched and prepared an equipment and budget proposal for camera gear procurement
- Prepared and formatted official documents for the university board

Projects

RoseJam Index : Personal Game Library Tracker

github.com/CinnamonPerfume/Rosejam-Index

A fully featured offline-first desktop application built with React and Electron for tracking personal game libraries. Designed and developed as a first full-stack project.

- Built custom IPC bridge for secure main/renderer process communication between Electron and React
- Implemented local data persistence via Node.js fs module and an automatic thumbnail caching system for offline cover images. No external database or internet required after first load
- Integrated RAWG Video Games Database API with infinite scroll search and relevance-based ordering; supports custom entries with user-provided covers for games outside the database

Stack: React, Electron, Node.js, RAWG API, CSS, electron-builder

Web Server Log Analyzer

github.com/CinnamonPerfume/Unique-Visitors

C program that processes up to 1M visit registrations and answers range queries returning unique visitor counts within any positional interval. Real-time two-command CLI with full input validation.

- Designed data structures for efficient per-user tracking and range computation over large datasets

Bank Account Interest Simulator

github.com/CinnamonPerfume/Bank-Account

C program that simulates a bank account with separate daily credit/debit interest rates, chronological transaction processing, and halos-precision rounding (truncation toward zero).

- Validated transaction ordering and all numeric input as it is read. No deferred validation

Linked List Platoon Manipulator

github.com/CinnamonPerfume/Marshal-Commands

C library implementing interleaved merge, even/odd split, and deallocation on singly linked lists using pointer relinking only. No struct copying permitted by spec.

- Handled all edge cases: empty lists, single-element lists, odd-length split with middle discard

Skills & Interests

Programming: C, Python, JavaScript, HTML, CSS, React

Technologies: git, SQL, Cisco Packet Tracer, Wireshark

Languages: Turkish (Native), English (Fluent, C1), Czech (Beginner, actively learning)
